ROLLE 9

R❂LLE 9

IS DURABLE AND EASY TO USE

Rolle 9 is the best choice for a wrapping machine, especially when the ease of use and durability are important.
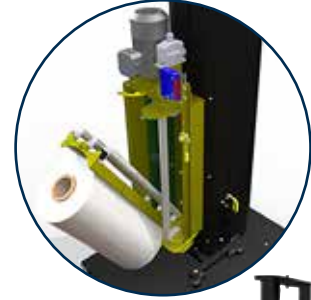

Quick and easy to use

1. **Simply select light or strong wrapping and then press the start button.**

- If necessary, the wrapping can be paused using the pause function. This is useful for loading products or fitting a top sheet.
- A photocell automatically recognizes the height of the pallet.
- The film roll is easy to change.

Pre-stretching of the wrapping film brings significant savings

2. **Efficient motorized Power Pre Stretch system.**

Fixed pre stretch level, up to 300 %.

- Consistency of film consumption.
- Consistency of packaging quality.

The tension of the wrapping film is easy to adjust

3. **Suitable tension for each product.**

- The tension of wrapping film may be easily adjusted to suit the wrapping required by the product and the desired stability during transport.
- The film can be fed manually with the help of a button in order to attach the film to the product pallet.

Turntable

4. **The rotation of the table is controlled with a frequency converter, which reduces mechanical stress and maintenance.**

- The stepless adjustment of the rotation speed and the soft start enable the wrapping of even unstable product pallets.
- The turn table always stops in the same location that enables the use of a ramp, which is available as an option.
- Available also as an FS version, enabling the use of pallet jacks.

Technical specifications

Power supply	220–240 V / 50 Hz	Rotation speed	1–11 rpm
Machine dimensions	2575 x 1650 mm	Max pallet load dim.	1200 x 1000 mm
Max height	3000 mm	Wrapping height	500–2600 mm
Turntable Ø	1650 mm	Max. pallet load weight	1200 kg
Turntable height	80 mm	Film reel Ø	<260 mm
Weight	390 kg		

The compact Rolle 9 is easy to transport and install.
